

**Luncheon Seminar 1**  
June 28 (Friday), 12:40-13:30  
Lecture Room: Room 1 (Auditorium)

# Update on Treatments For Diabetic Macular Edema

Chair

**Masahiko SHIMURA, MD, PhD**

Professor of Ophthalmology,  
Tokyo Medical University Hachioji Medical Center

What do you do in front of patients with diabetic macular edema (DME)? Some doctors may apply anti-VEGF agents and/or local corticosteroid, others may offer vitreoretinal surgery or may recommend simply observation without any intervention. The judgements depend not only upon clinical but social conditions. In this seminar, two retinal specialists will present their valuable and abundant experiences of treatment for DME, and also suggest what is the best way to treat DME. I highly recommend you to attend this lecture to obtain state-of-the-art information, and hope it useful for your medical treatment.

**Update on medical treatments for  
diabetic macular edema**

Speaker

**Miho NOZAKI, MD, PhD**

Assistant Professor,  
Department of Ophthalmology and Visual Science,  
Nagoya City University Graduate School of Medical Sciences

**Update on surgical treatments for  
diabetic macular edema**

Speaker

**Yuki MORIZANE, MD, PhD**

Associate Professor,  
Department of Ophthalmology Okayama University  
Graduate School of Medicine

Co-sponsored by GOIW2019 and Novartis Pharma K. K.
